

HAVE YOU TRAINED YOUR STAFF IN THE safeRclean™ PROGRAM?

Astute Property Managers are asking for proof of training as part of their tender process. It is critical that your company is able to remain competitive by re-assuring your clients that your employees and sub-contractors have been trained in current safe work practices.

By implementing the safeRclean™ program you will have proof in the form of employee safeRclean™ cards and training registers to demonstrate that you have trained employees in current safe work practices. Should a WorkCover Inspector visit your site, or an accident occur, you will have visible and up to date information readily available.

This 3 hour training course is available to anyone currently working in the cleaning industry or applying to work as a cleaner. Following the successful launch of safeRclean™ as an industry standard in 2005, Lennox Institute has assisted to raise the safety standards benchmark in the cleaning industry by training thousands of cleaners.

We are currently taking group bookings for on site deliveries of the safeRclean™ program for clients who prefer to deliver the training 'in house'. Public courses may also be arranged.

safeRclean™ assists you to meet your OH&S obligations and 'Duty of Care' by ensuring that your employees are adequately trained.

- safeRclean™ is an OH&S safety induction covering the latest competency standards and the basic skills of a cleaner's role.
- safeRclean™ is designed to assist employers to implement and improve safe work practices.
- safeRclean™ may also be used as a refresher course for staff having already undergone training but requiring to be updated.

Topics covered include:

- Understanding & Improving OH&S in the workplace
- Cleaning Storage areas
